

Thermography and AmpCoil

Dr. Anthony Piana is the president of LLC Thermographic Wellness, a non-profit organization striving to bring standards to the medical thermal imaging industry.

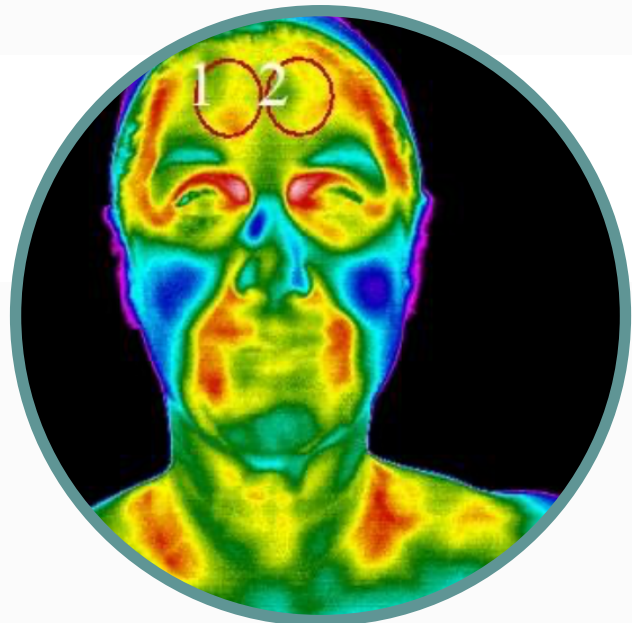

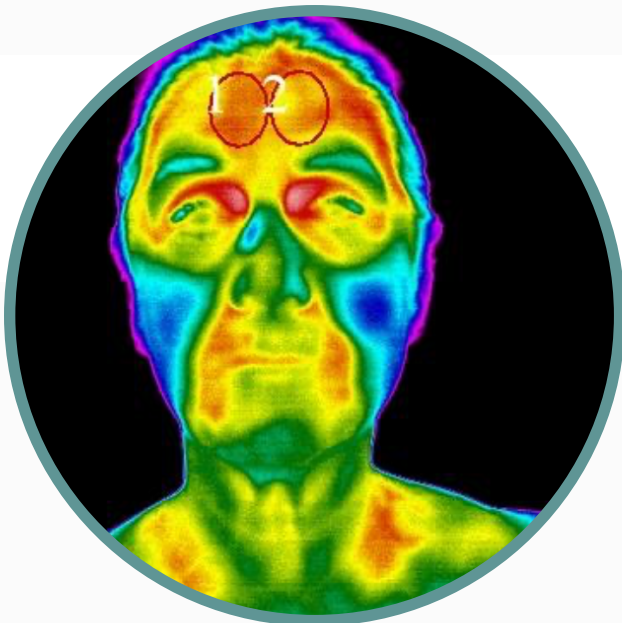

This Thermal Analysis report is based on study guidelines that are based on side-to-side temperature intensity measurement and comparison, established thermological signs including pattern recognition and comparison of changes over time.

This method of analysis allows objective clinical correlation by the patient's physician and contributes to the decision-making process regarding therapy, additional testing and eventual diagnosis.

Pre and Post AmpCoil: 45 minutes

Increased circulation in left arm, possibly associated with a compressed nerve in cervical spine.

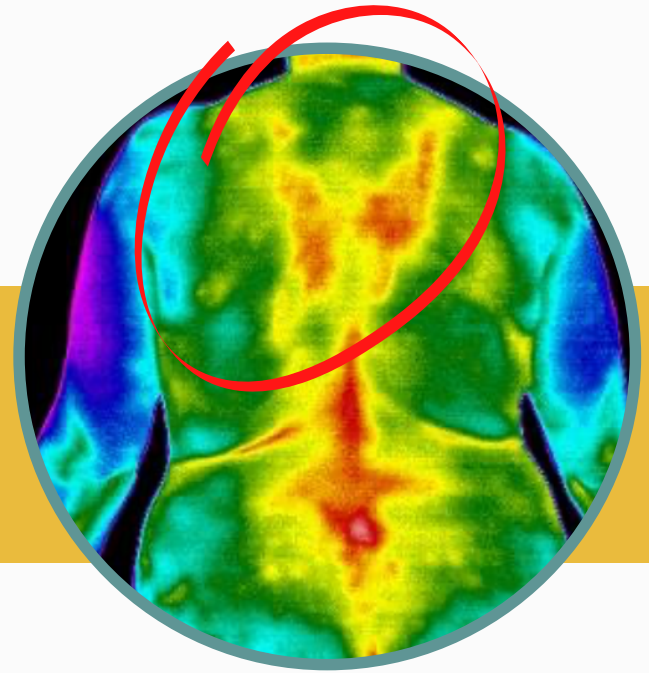

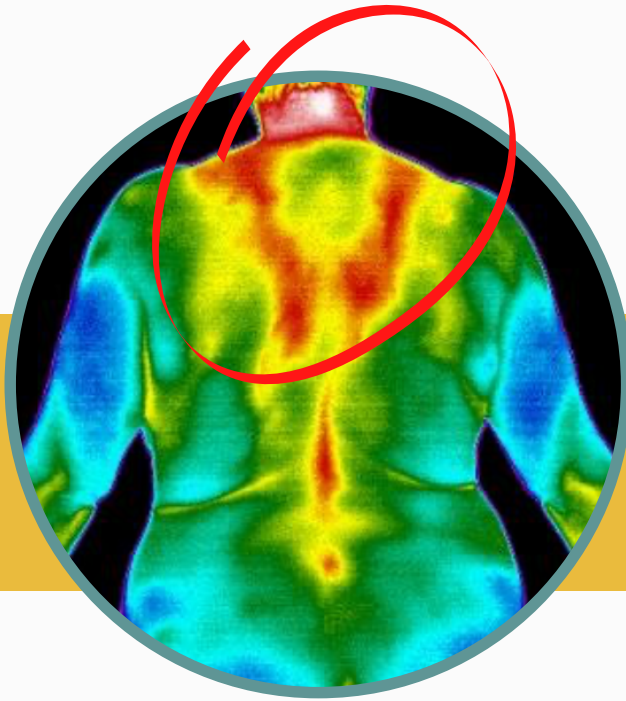

Decreased inflammation present in frontal lobes post AmpCoil.

Thermography and AmpCoil

Dr. Anthony Piana is the president of LLC Thermographic Wellness, a non-profit organization striving to bring standards to the medical thermal imaging industry.

Pre and Post AmpCoil: 45 minutes

Increased circulation in cervical spine and dramatic reduction in localized inflammation and referred pain.

These images were collected after running each participant through a 30 minute sound program from the BetterGuide software on the AmpCoil System followed by a 17 minute journey to compliment frequencies associated detoxification pathways.

The AmpCoil System is not intended to diagnose, treat, prevent, cure or mitigate any disease. Always seek the advice of your physician or other qualified health provider to determine if the AmpCoil System, powered by the BetterGuide software application, is right for you, or with any questions you may have regarding usage.
